

Seniors in the Knowledge Society Grundtvig Learning Partnership

Ulm meeting agenda February 8th, 9th and 10th, 2012

Description

This is the second meeting of the SeniorsKS Learning Partnership. The first meeting that took place in October 2011 in Castellon all the institutions had the chance to know each other better, to know the main interests and also the areas of expertise of each partners. In this second meeting it is aimed to detail the activities that each organisation will do in the framework of the project, and based on each institution interests and expertise to construct the basis where the exchange of knowledge and expertise will be produced.

More information about the project at <http://www.seniorskseu>

Aims

All the partners will have to prepare a very short presentation of 30 minutes (that includes discussion and questions) about the activity that will be done during all the project. During that presentation, other institutions could join the activity and therefore to collaborate doing the activity till the end of the project. That presentation would include the plan for designing, implement, test and evaluate an activity related to the seniors education and ICT. The different phases of the activity will be presented in future meetings.

The learners must be an active part of the activity to implement. During the meeting, they can also participate.

Deliverables

Each partner has to deliver a general proposal of the activity to design, implement, test and evaluate.
