

Improve and extend

**from lectures to distance
e-learning**

Petra Suhajova (University Centre Zvolen)

E-Learning is not just "**E-Training**" - it is the synergy of information-on-demand, multimedia communication, social collaboration, instruction, discovery and exploration that **interactively engages the learner** with greater learning opportunity.

Richard Otto

Activity Proposal

- UIS – University Information System
 - Inspiration in www.e-senior.cz
 - E-senior project will be created especially for seniors from the regions all around the country who are interested in education but cannot be present at the lessons of the University of the Third Age for various reasons.
 - To create our own e-learning tools (ideo lectures)
 - Learn from other partners (e.g. wiki – new experience for our seniors)
 - Motivate senior students to learn through Internet (ICT courses, use of e-learning tools)
-

TOOLS:

<p>E-mail PowerPoint Internet</p>	<p>Video lectures, Virtual Classroom (live & recorded), Blended learning</p>	<p>Online courses, Virtual Classroom (live & recorded), Workshops</p>	<p>Interactive whiteboards, Digital collaboration (team learning and mentoring), Video conferences</p>
---	--	---	--

Benefits for administrators

For students

UIS	Electronic study application form
	Registration of applicants
	Students evidence
	Review of study programmes and study plans
	Schedules
	E-learning (Study materials, videos, test and examination, library of e-objects, mail box, document server, discussion platforms)
	Room reservation
	Statistics
	Everything in one place!

Video lectures at Harvard Distance Education

Visualization

To convey information through graphical representations

The slide displays several data visualizations. On the left is a map of the United States with circular markers of varying sizes and colors (brown and grey) placed over different states. In the center are two pie charts under the heading 'FEDERAL SPENDING ON EDUCATION AND TRAINING, 2008 DOLLARS'. The first pie chart is for 2008, showing segments for 1972 (23.3%), 1978 (25.4%), and 2008 (51.3%). The second pie chart is for 2011, showing segments for 2008 (28.7%), 2011 (52.1%), and 2011 (19.2%). To the right of the pie charts is a map of the United States with colored regions. Below the pie charts is a red heatmap visualization. At the bottom right is a graphic with the text 'United States State Congress President' in a stylized font.
